SUMMARY

Technical Project Manager with 7 years of experience in technology delivery, including 4 years leading enterprise cloud migrations, SAP integrations, and data platform modernization across North America and global markets. Delivered \$3M+ in cost savings and cost avoidance through vendor management, risk management, and cross-functional leadership. Skilled at coordinating tech, business, and vendor teams from initiation through go-live and hypercare.

CORE SKILLS & TECHNOLOGIES

Project & Delivery: Project Initiation & Planning, Agile, Scrum, Waterfall, Hybrid, Scope & Requirements Management, RAID & Dependency Management, Risk Management, Change Management, RACI & Governance, Budget & Resource Planning, Vendor/SOW Management, Stakeholder Management, Executive Status Reporting, Test Management, Cloud & Infrastructure Migration

Tools & Platforms: Smartsheet, Planview, Clarity PPM, Jira, Confluence, SAP AFS, Databricks Lakehouse, Power BI, SQL, SSRS, Spotfire, Excel

PROFESSIONAL EXPERIENCE

Adidas - Technical Project Manager, Portland, OR

June 2024 - Present

- Lead a two-vendor integration connecting ServiceNow/Aspen with CBRE's facilities management systems to deliver a centralized workplace experience for employees, owning the project plan, RACI, and timeline and running delivery through Scrum.
- Led project planning for an agentic PO-reroute solution integrating SAP, UiPath agents, and RPA with human-in-the-loop controls, aligning global and local stakeholders through process mapping, timelines, and executive presentations.
- Led an SAP enablement project establishing wholesale distribution capability for 140K World Cup soccer balls, supporting 2026 World Cup net sales.
- Established PMI-aligned documentation standards for the Data Analytics team, including project charters, RACI matrices, and RAID logs, creating a repeatable framework for managing scope, cost, schedule, and risk.
- Led UAT, cutover, and hypercare for a 3PL integration across SAP, TIBCO, WMS, and GT Nexus, coordinating 20+ teams to close 99% of defects and go live with zero business disruptions.
- Directed 10+ engineers through Agile development of a manufacturing application replacing a 30-year-old system, avoiding \$2M in replacement costs.
- Drove a Waterfall migration of 700+ users from a legacy SQL database to Databricks Lakehouse and Power BI, reaching 95% adoption across North America.
- Ran a telecom RFP as a structured project for 2,000+ employees, coordinating a three-vendor evaluation and reporting status to executives up to the North America President, securing \$1.5M in savings.
- Coached 2 project managers on planning, status reporting, and governance, supporting their growth into independent ownership.

Adidas - Assistant Technical Project Manager

Nov 2022 - June 2024

- Led a hybrid Agile/Waterfall migration of on-premises servers to AWS global cloud infrastructure, directing 15+ engineers through scope, testing, and cutover and delivering on time with \$200K in annual savings.
- Directed business teams and SAP developers through requirements, testing, sign-off, and production readiness for SAP functionality in the B2B platform migration, managing change control to deliver within scope and budget.
- Coordinated technology workstreams for North America divestiture, aligning stakeholders and tracking changes, dependencies, and contractual discussions to meet Transition Services Agreement (TSA) milestones.
- Reduced rework by 20% by standardizing delivery in Jira, Confluence, and Smartsheet and clarifying requirements, budgets, and roadmaps, improving milestone tracking and stakeholder visibility.

Adidas - Technology Analyst

Aug 2021 - Nov 2022

- Acted as RPA business analyst for the brand team, documenting processes in PDDs, designing workflows, and managing build-to-deployment with the RPA team, eliminating 22 manual processes and saving 19,000 labor hours and \$950K.

- Served as technical liaison to the brand team, refining requirements, reprioritizing demand, and submitting change requests to the global team to build local needs into the global platform.
- Led application rationalization across 70+ applications and reports, identifying redundant systems and mapping their data flows and dependencies to enable phased transition to a new global one-stop-shop platform.
- Resolved application issues for vendors and business users through root cause analysis, achieving a 95% resolution rate.

BMO Financial Group - Technology Analyst, Chicago, IL

Jun 2019 - Aug 2021

- Managed a \$1.5M annual budget across three projects in Clarity PPM, owning monthly forecasting, roadmap and capacity tracking, and resource allocation to reduce overspending by 10%.
- Coordinated cross-functional project planning and status reporting through Jira and Confluence, improving issue visibility.
- Built SQL and SSRS dashboards to monitor check processing across 120+ U.S. bank locations, enabling faster issue detection during project cutover.

EDUCATION

University of Illinois, Springfield, IL

Aug 2021 - Dec 2023

Master of Science (M.S.) - Management Information Systems; Graduate Certificate - IT Project Management

Illinois State University, Normal, IL

Jan 2016 - May 2019

Bachelor of Science (B.S.) - Industrial Technology
